Sleep Disrupters

- Too much food or drink close to sleep time
- Blue light from phone/computer/television screen
- Caffeine and alcohol use
- Stress/anxiety/worry
- Certain noises/sounds
- Temperature (too hot or too cold)
- Lack of daytime sunlight exposure
- Medications and medical conditions
- Bed partner and/or pets

Tips for Better Sleep

- Use bed for sleep only
- Establish regular sleep schedule (same sleep and wake times)
- Minimize/eliminate bedroom noise and lights
- Increase daytime exposure to sunlight
- Move at least every hour during the day
- Eliminate nighttime caffeine and limit daytime caffeine
- Avoid alcohol within 3 hours of bedtime
- Avoid high-sodium foods close to bedtime
- Eliminate/limit after-dinner and late-night snacking
- Maintain a healthy BMI
- Stay hydrated during the day
- Cognitive Behavioral Therapy for Insomnia
- Exercise
- Food choices
- Meditation

Sleep Management Goals

Setting goals around sleep health is a great way to increase your sleep quality. It’s often easier to achieve positive goals. An example of a positive sleep goal is, “I will begin a new bedtime routine of shutting off the television and instead, read a book for at least 30 minutes before bed, four nights this week.”

Specific - What are you going to do to improve your sleep quality/quantity?
Measurable - How much time, how many sessions?
Attainable - Do you have what it takes to follow through?
Realistic - What can you actually do? (improvement over perfection)
Time-Connected - How frequent? How long will you commit?
